Avalon Development Corporation, a Fairbanks, Alaska-based mineral exploration consulting firm, currently is interviewing prospective candidates for one seasonal position in Alaska for 2017:

Senior Geologist – Orogenic Au Project: Primary duty will be diamond drill core logging and drill management. Initial start will be approximately May 15 with work extending through August 31, with possible extension of work depending on results. Salary is dependent on experience, competitive with Alaska-based wage levels. Benefits include worker's comp, emergency medical evacuation. Bachelor's and Master's degrees required in geology or geological engineering fields. Applicant must have at least 10 years minimum experience in positions of increasing responsibility in the mineral exploration industry. Experience in orogenic and/or intrusive-related gold systems is required. Professional geologist certification a plus but not required. Operating mine experience a plus but not required. Personnel management experience a plus but not required. Applicant must have remote camp experience and be functional in use of GIS applications. Applicant must possess strong written and verbal communications skills. Applicant must be willing to spend significant time living and working in remote camps under field conditions. Applicant must be able to pass a pre-employment background check and drug test and applicant must be willing to submit to random drug and alcohol testing on the job.

Persons interested in these positions may apply in the following ways:

- 1. Resumes with references and/or a letter of interest may be emailed to: avalon2@avalonalaska.com with the words "Senior Geologist" in the subject line.**
- 2. Your Resume with references and/or a letter of interest can also be faxed to 907-455-8069**
